App Update Screen

App Update

Folder	Revision	Active Folder	Active Folder
A	20.1.7	Inactive	*'Active Folder' is the folder from which the application runs.*
B	20.1.8	Active	**Revision: cc.mm.ff**

'cc' - Backward compability ensured within 'cc' revisions.
E.g. 20.5.0 is backward compability with 20.1.0

'mm' - Introduction of a new feature.

'ff' - Functional improvements and bug fixes.

Exit to Update Utility   *Pressing 'Exit to Update Utility' will close the Application and launch the Utility.*   Exit

Press "Exit to Update Utility" to download the latest App revision.

App Update Utility

The application runs from either Folder A or B.

The "**Active Folder**" is the folder from which the application is presently running.
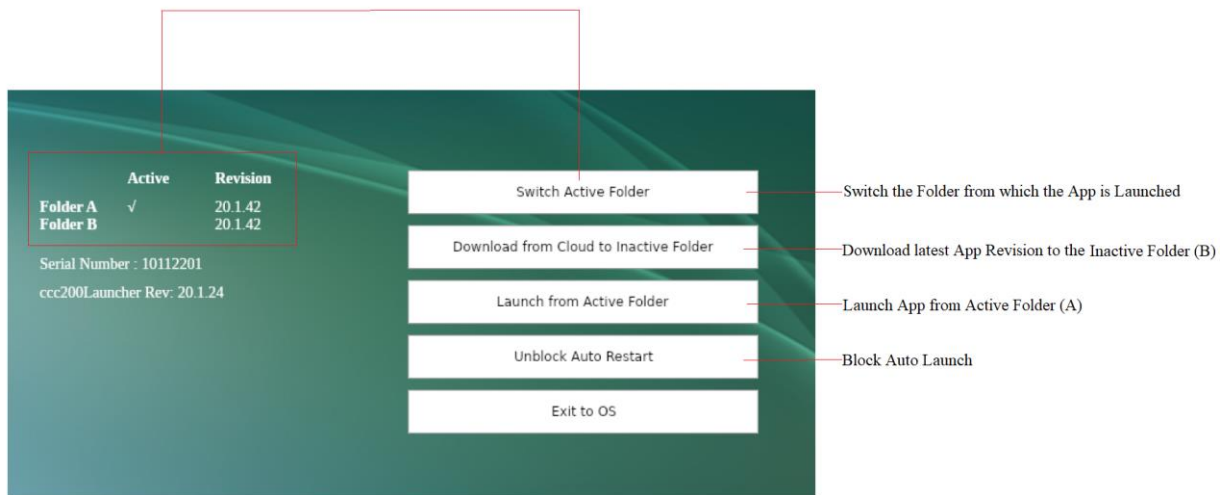

The "**Switch**" button will toggle the "Active Folder".

The **"Download from the Cloud to Inactive Folder**" button will retrieve the latest released application revision from the cloud. The retrieved application is placed in the "**Inactive**" Folder.
